

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + Refrain from automated querying Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + Keep it legal Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

A propos de ce livre

Ceci est une copie numérique d'un ouvrage conservé depuis des générations dans les rayonnages d'une bibliothèque avant d'être numérisé avec précaution par Google dans le cadre d'un projet visant à permettre aux internautes de découvrir l'ensemble du patrimoine littéraire mondial en ligne.

Ce livre étant relativement ancien, il n'est plus protégé par la loi sur les droits d'auteur et appartient à présent au domaine public. L'expression "appartenir au domaine public" signifie que le livre en question n'a jamais été soumis aux droits d'auteur ou que ses droits légaux sont arrivés à expiration. Les conditions requises pour qu'un livre tombe dans le domaine public peuvent varier d'un pays à l'autre. Les livres libres de droit sont autant de liens avec le passé. Ils sont les témoins de la richesse de notre histoire, de notre patrimoine culturel et de la connaissance humaine et sont trop souvent difficilement accessibles au public.

Les notes de bas de page et autres annotations en marge du texte présentes dans le volume original sont reprises dans ce fichier, comme un souvenir du long chemin parcouru par l'ouvrage depuis la maison d'édition en passant par la bibliothèque pour finalement se retrouver entre vos mains.

Consignes d'utilisation

Google est fier de travailler en partenariat avec des bibliothèques à la numérisation des ouvrages appartenant au domaine public et de les rendre ainsi accessibles à tous. Ces livres sont en effet la propriété de tous et de toutes et nous sommes tout simplement les gardiens de ce patrimoine. Il s'agit toutefois d'un projet coûteux. Par conséquent et en vue de poursuivre la diffusion de ces ressources inépuisables, nous avons pris les dispositions nécessaires afin de prévenir les éventuels abus auxquels pourraient se livrer des sites marchands tiers, notamment en instaurant des contraintes techniques relatives aux requêtes automatisées.

Nous vous demandons également de:

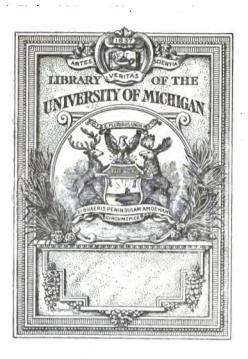

- + Ne pas utiliser les fichiers à des fins commerciales Nous avons conçu le programme Google Recherche de Livres à l'usage des particuliers. Nous vous demandons donc d'utiliser uniquement ces fichiers à des fins personnelles. Ils ne sauraient en effet être employés dans un quelconque but commercial.
- + Ne pas procéder à des requêtes automatisées N'envoyez aucune requête automatisée quelle qu'elle soit au système Google. Si vous effectuez des recherches concernant les logiciels de traduction, la reconnaissance optique de caractères ou tout autre domaine nécessitant de disposer d'importantes quantités de texte, n'hésitez pas à nous contacter. Nous encourageons pour la réalisation de ce type de travaux l'utilisation des ouvrages et documents appartenant au domaine public et serions heureux de vous être utile.
- + *Ne pas supprimer l'attribution* Le filigrane Google contenu dans chaque fichier est indispensable pour informer les internautes de notre projet et leur permettre d'accéder à davantage de documents par l'intermédiaire du Programme Google Recherche de Livres. Ne le supprimez en aucun cas.
- + Rester dans la légalité Quelle que soit l'utilisation que vous comptez faire des fichiers, n'oubliez pas qu'il est de votre responsabilité de veiller à respecter la loi. Si un ouvrage appartient au domaine public américain, n'en déduisez pas pour autant qu'il en va de même dans les autres pays. La durée légale des droits d'auteur d'un livre varie d'un pays à l'autre. Nous ne sommes donc pas en mesure de répertorier les ouvrages dont l'utilisation est autorisée et ceux dont elle ne l'est pas. Ne croyez pas que le simple fait d'afficher un livre sur Google Recherche de Livres signifie que celui-ci peut être utilisé de quelque façon que ce soit dans le monde entier. La condamnation à laquelle vous vous exposeriez en cas de violation des droits d'auteur peut être sévère.

À propos du service Google Recherche de Livres

En favorisant la recherche et l'accès à un nombre croissant de livres disponibles dans de nombreuses langues, dont le français, Google souhaite contribuer à promouvoir la diversité culturelle grâce à Google Recherche de Livres. En effet, le Programme Google Recherche de Livres permet aux internautes de découvrir le patrimoine littéraire mondial, tout en aidant les auteurs et les éditeurs à élargir leur public. THÉRAPEUTIQUE HOMŒOPATHIQUE.

- TABLEAU DE LA PRINCIPALE SPHÈRE D'ACTION ET DES PROPRIÉTÉS CARACTÉRISTIQUES DES REMÈDES ANTIPSORIQUES, par le docteur Bænninghausen, précédé d'un Mémoire sur la Répétition des doses, par le docteur Héring, traduit de l'allemand par de Bachmeteff et T. Rapou, avec des considérations sur les remèdes homœopathiques. Paris, 4846, in-8.
- ESSAI D'UNE THÉRAPIE HOMEOPATHIQUE DES FIÈVRES INTERMITTENTES, par C. de Bænninghausen, traduit de l'allemand par C de Bachmeteff et Rapou. Lyon, 4838. in-8. 2 fr. 50 c.
- wouvel organe de la médecine spécifique, ou Exposition de l'état actuel de la méthode homosopathique, par le docteur J.-L. Rau, suivi de nouvelles expériences sur les doses dans la pratique de l'homosopathie, par le docteur G. Gross, Traduit de l'allemand par le docteur D. R. Paris, 1845, in-8 de 304 pages.

Fruit d'une longue pratique, de connaissances sérieuses et d'un jugement solide, cet ouvrage, riche d'aperçus nouveaux et vrais, est destiné à la propagation de l'homesopathie parmi les médecins, parce qu'il parle le langage de la science, un peu trop négligé dans la plupart des écrits de la nouvelle école.

- régime à suivre pendant le traitement des maladies et la thérapeutique homœopathique, par le docteur Bigel, précédé d'une notice sur l'hôpital homœopathique de la Charité de Vienne, 2° édit., entièrement refondue, par le docteur Beauvais (de Saint-Gratien). Paris, 4839, in-48 de 624 pages.

- EFFETS TOXIQUES ET PATHOGÉNÉTIQUES DE PLU-SIEURS MÉDICAMENTS sur l'économie animale dans l'état de santé, par le docteur *Beauvais* (de Saint-Gratien). Paris, 4845, in-8 de 420 pages, avec huit tableaux in-fol. 7 fr.

Dans cet ouvrage, l'auteur a eu pour but de présenter, pour un certain nombre de médicaments, le tableau des symptômes qui ont été observés sur l'homme bien portant, soit par les hasards de la toxication, soit par des expériences faites exprès et conduites avec prudence.

PRÉFACE DU TRADUCTEUR.

Il y a plusieurs années, — c'était en 1837, — qu'un sayant médecin homœopathe, le docteur Héring, de Philadelphie, en parlant de la difficulté qu'on éprouve à se reconnaître au milieu de l'immense quantité de symptômes fournis par plusieurs de nos médicaments, s'exprimait ainsi avec beaucoup de raison: "Rien qu'à voir les médicaments avec leurs longues séries de symptômes, les novices en homœopathie s'imaginent qu'il est impossible d'apprendre à connaître les symptômes d'un seul médicament, à l'instar d'un campagnard qui se trouve pour la première fois dans une grande ville, et qui s'étonne qu'on puisse se reconnaître au milieu de tant de rues. Et cependant, au bout de quelque temps, il finit par s'y reconnaître lui-même. Comment y parvient-il? Cela mérite la peine d'être examiné. Personne n'ignore que l'habitant d'une grande ville transporté dans une ville étrangère, n'offrît-elle avec la ville qu'il habite que peu d'analogies, s'y trouve moins embarrassé que tout autre. Il faut qu'il se soit fait, sans en avoir conscience, un plan qui l'aide à s'orienter promptement dans une ville étrangère. »

Pour suivre la comparaison de M. le docteur Héring, je ferai observer qu'un individu peut connaître parfaitement une, deux, trois grandes villes; mais que plus le nombre des villes qu'on a à connaître augmente, plus la connaissance que l'on en a est faible et superficielle, et que finalement elle se réduit et doit se réduire à quelques rues, à quelques places publiques, à quelques monuments: car la mémoire, quelque heureuse qu'elle puisse être, a des limites au-delà desquelles cesse toute certitude.

Si l'on examine de près la manière de procéder des médecins homœopathes, on trouvera mon assertion par-

2000

faitement justifiée. Quelques uns connaissent bien dix à vingt médicaments, d'autres quarante, d'autres soixante, etc., tandis qu'ils n'ont du reste qu'une connaissance superficielle; qu'ils ne connaissent que quelques places, quelques monuments, et dans la pratique, ils se tiennent de préférence dans les rues qui leur sont bien connues, négligeant les trésors qu'ils pourraient rencontrer dans d'autres villes, et dont souvent même ils ne soupconnent pas l'existence.

L'impossibilité de connaître un grand nombre de villes dans tous leurs détails avec le secours de la mémoire seule, a donné l'idée de dresser des plans de ces villes, en y joignant pour les immenses capitales, comme Paris et Londres, que peu de ceux même qui y sont nés, fussentils doués de la meilleure mémoire, pourraient connaître exactement, une liste alphabétique des rues, impasses, cités et cours. Au moyen de ces plans, pourvu qu'on ait l'habitude de s'en servir, il est aisé de se reconnaître dans quelque ville que ce soit, si l'on a seulement cer-

tains points de repère.

On était parfaitement convaincu de la vérité de ce que nous venons de dire, lorsqu'on se sentit pénétré de la nécessité de rédiger de parcils guides pour la symptomatologie des médicaments homœopathiques. Beaucoup ne virent dans des ouvrages de cette nature qu'un travail purement mécanique, tandis que quelques autres les estimèrent infiniment au-dessus de leur valeur réelle, et en proclamèrent les auteurs les seuls élus à qui il ait été donné d'ouvrir aux enfants des hommes les portes du royaume des cieux. Comme toujours, les uns et les autres tombèrent dans l'exagération. L'auteur d'un dictionnaire n'a nullement besoin d'être un prosateur, un poëte de renom, et l'écrivain qui manie le plus habilement la langue est souvent forcé de recourir aux travaux de Boiste, de Landais. Rendons à chacun la justice qu'il mérite, et parce

que nous différons d'opinions sur quelques points tout-à-fait secondaires de l'homœopathie, ne nous divisons pas en deux camps ennemis uniquement occupés à dévoiler aux yeux de la foule les défauts du parti contraire, tout en n'apercevant qu'à travers le nuage de l'amour-propre les haillons qui dissimulent à peine notre propre nudité. Qui de nous, à cet égard, n'a aucun reproche à se faire? Si nul n'est exempt de pareilles faiblesses, chacun participe aussi à la prérogative humaine de s'amender, de reconnaître sa propre imperfection, et d'apprendre à user de tolérance pour les opinions des autres.

Rendons justice aux efforts de MM. Bænninghausen et Jahr. Ils ont épargné bien des heures de travail à un grand nombre de médecins homœopathes; ils ont signalé à plusieurs d'entre eux la route la plus courte pour sortir du labyrinthe de la matière médicale; ils ont attiré leur attention sur une quantité d'objets qui, sans eux, seraient passés inaperçus ou n'auraient point été suffisamment remarqués. Leurs travaux seront perfectionnés avec le temps, soit par eux-mêmes, soit par leurs successeurs; ils s'enrichiront des découvertes nouvelles; ils se débarrasseront de l'inutile et du superflu.

Les ouvrages de ces deux écrivains diffèrent à plusieurs égards. M. Jahr, dans son Manuel, s'est appliqué à présenter aux débutants homœopathes le plan général de tous les médicaments expérimentés, à désigner les symptômes les plus importants et leurs caractères les plus saillants. M. Bœnninghausen s'est borné aux 125 médicaments les plus connus et éprouvés dans la pratique; mais il descend dans les plus minutieux détails. La base de son travail n'est pas un précis, mais la totalité des symptômes de la matière médicale. A l'aide de ce livre, il devient facile de remonter à la source même pour trouver un médicament offrant l'analogie la plus parfaite avec une maladie donnée.

Dans les travaux de ce genre, publiés par lui antérieurement, M. Bænninghausen avait divisé les médicaments en Antipsoriques et Apsoriques; dans celui-ci, il a adopté l'ordre alphabétique qui mettra d'accord les sectateurs et les adversaires de la théorie de la psore. Les malheureuses querelles soulevées par cette théorie se sont d'ailleurs apaisées en Allemagne; elles n'exercent au moins aucune influence sur la pratique; on administre le phosphore et le soufre avec autant de succès dans les maladies aiguës non miasmatiques que l'on donne la noix vomique ou l'aconit dans les maladies chroniques miasmatiques.

M. Bænninghausen a admis dans son Manuel les données fournies par la pratique au lit des malades, ou, en d'autres termes, les effets cliniques. Nous croyons que sous ce rapport, loin de le blâmer, le public homœopathique éclairé lui accordera des éloges. Entre les symptômes d'une maladie naturelle et ceux d'une maladie produite par des médicaments, il y aura toujours une très grande différence. On ne peut espérer ici qu'une ressemblance approximative, portant sur certains points généraux. La matière médicale pure, en effet, est très riche en maladies ne consistant qu'en douleurs, sensations, augmentation ou diminution des sécrétions; mais quant aux accidents morbides qui ont pour cause des altérations organiques, des métamorphoses matérielles dans l'organisme, on ne peut rien attendre d'expérimentations sur des personnes bien portantes. Il faut donc accueillir avec reconnaissance les faits fournis par la pratique, et se garder de rejeter les données de la clinique homœopathique, quelque nombreuses que puissent être les erreurs qu'elle commet. Que celui qui trouve l'occasion de les rectifier le fasse; mais qu'on ne méprise aucune indication, de quelque part qu'elle vienne; car on ne saurait trop se répéter que tous tant que nous sommes, le plus riche en science comme le plus pauvre, le plus

occupé comme celui qui l'est le moins, nous sommes souvent forcés de tâtonner, et les médecins les plus savants, les plus célèbres de tous les temps, ont été obligés de faire des aveux semblables.

Qu'on ne s'imagine pas que par de telles assertions je veuille attenter à l'honneur de la médecine; la même incertitude, la même imperfection est inhérente à toutes les sciences, à tous les arts, à tous les métiers: seulement leurs défauts ne sont pas aussi remarqués, parce qu'ils ne s'occupent pas d'une chose aussi précieuse que la santé. En accusant d'incertitude et d'imperfection les sciences, je n'en excepte pas les sciences exactes. Cellesci ne sont exactes que comme sciences abstraites. Sous le point de vue de la pratique, leur exactitude est fort compromise, et trop souvent il arrive qu'on est tenté d'appliquer à leurs données une épithète toute contraire. Ainsi les mathématiques, la plus positive de toutes les sciences, nous apprennent que un et un font deux. Exprimer à cet égard le doute le plus léger, ce serait vouloir passer pour un être dépourvu de tout bon sens. En théorie, cela est aussi parfaitement exact; l'unité abstraite additionnée avec l'unité abstraite donnera toujours deux; mais qu'on applique cette vérité abstraite, et elle ne sera plus vraie absolument : car un volume de liquide (alcool rectifié) mêlé avec un autre volume de liquide (eau) donne un volume moindre que la somme des deux volumes. De semblables exemples abondent dans les sciences, et sont trop connus pour que nous ayons besoin de nous y arrêter plus longtemps.

La médecine aussi a sa partie positive, comme, par exemple, l'anatomie; mais, dans la pratique, cette science positive descend au rang de simple science auxiliaire. Une dame voulut un jour témoigner à un célèbre médecin du siècle passé son admiration pour ses grands talents; elle se mit à vanter ses profondes connais-

sances anatomiques, en lui disant qu'un homme qui connaissait aussi bien la structure du corps humain devait être un grand médecin. Hélas! lui répondit-il, nous autres anatomistes, nous sommes comme les gardes de nuit: nous connaissons toutes les rues, toutes les maisons du corps humain; mais nous ne savons pas ce qui se passe dans ces maisons.

Outre l'anatomie du corps mort, il y a encore, pour parler comme Paracelse (1), une anatomie vivante, qui est la connaissance de l'affinité du monde extérieur pour certaines parties du corps. Qu'on introduise certaines substances par une de ses portes dans la ville du corps humain, et, sans avoir besoin de guide, elles sauront trouver leur chemin à travers le dédale des rues, et se loger dans un organe spécial. Cette affinité particulière de certaines substances pour certaines parties du corps ne peut plus être révoquée en doute, et la première partie du Manuel de M. Bænninghausen est spécialement destinée à indiquer sur quelles parties du corps les médicaments ont l'habitude d'agir de préférence.

Si l'on savait seulement que tel médicament exerce une action spécifique sur tel ou tel organe, sur tel ou tel tissu de l'organisme, on ne saurait encore que fort peu de chose. Sans doute, acquérir la connaissance du siége d'une maladie et celle des médicaments qui exercent une action directe sur ce siége, c'est avoir fait déjà un grand pas dans l'art de guérir; mais dans la pratique, ce n'est pas tout, ce n'est même pas as sez. Chaque organe, chaque système d'organes peut être attaqué différemment par les maladies, et des médicaments qui exercent une action spécifique sur un même organe peuvent agir sur lui de différentes manières. Mais l'anatomie et la physiologie

⁽¹⁾ Cur enim chelidonia medicina est in icteritia. Nempe propter suam anatomiam. Jam quotuplices in icteritia medicinæ sunt: tot species etiam existunt icteritiæ; et totidem etiam anatomias, hoc est cognitiones earum in differentiis morborum habere debetis. (Opera omnia, Genevæ. 1669, I, p. 668.)

n'ont pas encore fait assez de progrès pour qu'on puisse caractériser exactement les différences des éléments d'un organe, en sorte qu'en vouloir connaître les différences pathologiques, ce serait exiger l'impossible dans l'état actuel de la science.

Jusqu'ici nous n'avons le plus souvent pour nous aider que les différentes douleurs et des sensations, guide souvent trompeur, nous sommes forcés de le reconnaître; mais comme c'est l'unique auxiliaire dont nous disposions, il serait absurde de le mépriser à cause de son imperfection. S'il ne donne pas une certitude complète, il est au moins un acheminement vers la perfection, à laquelle, comme nous l'avons dit, nos descendants seulement pourront atteindre.

Les sensations (sensations et douleurs) que produit un médicament chez différentes personnes sont toujours exprimées, dans la matière médicale de Hahnemann, par les expressions individuelles de la personne soumise à l'expérimentation. Il en est résulté, dans l'homœopathie, une infinité d'expressions synonymes: aussi doit-on savoir gré à M. Bœnninghausen d'avoir rassemblé sous une seule rubrique un grand nombre de ces synonymes; car la différence de l'expression ne constitue pas une différence de sensation, mais seulement une manière différente de l'exprimer par la parole.

Pour notre compte, nous aurions désiré que M. Bœnninghausen se fût montré plus hardi encore sous ce rapport. Par exemple, nous connaissons fort bien, relativement aux excrétions digestives qui se font par la bouche, la différence entre l'éructation ou sortie de gaz, le rapport ou sortie de liquide, la régurgitation ou sortie de parcelles d'aliments; nous connaissons la différence entre la nausée ou envie de vomir, et le vomissement; mais nous n'en connaissons aucune entre envie de vomir, nausée ou malaise d'estomac. Et cependant on trouve encore indiqués sous ces différentes rubriques différents médica-

ſ

ments dans le Manuel aussi bien que dans la matière médicale.

Partout où, dans cet ouvrage, nous avons rencontré des synonymes, les médicaments étant identiquement les mêmes, nous avons évité ces répétitions dans l'intérêt du lecteur. S'il s'y en trouve encore quelques unes, c'est qu'elles ont échappé à notre attention soutenue. Quand, sous des noms synonymes, étaient donnés des médicaments différents, nous avons été naturellement forcé de suivre l'auteur, à qui nous en renvoyons la responsabilité, si quelqu'un, sans tenir compte de la difficulté de la tâche, était disposé à lui en faire un reproche.

M. Bœnninghausen n'a pas mis de table générale à son ouvrage, nous avons regardé comme un devoir cette addition indispensable. Une table alphabétique est la clef d'un livre de cette nature.

En respectant toujours les grandes divisions établies par l'auteur, nous avons introduit quelques changements dans l'intérieur de ces divisions. Nous avons abandonné l'ordre alphabétique, et nous y avons substitué autant que possible un ordre scientifique. L'essai d'étiologie, dans sa forme imparfaite, est aussi notre œuvre auquel du reste nous n'attachons aucun mérite. Nous avons essayé de placer sous l'égide de ce Manuel une terminologie homæopathique. Tous ceux à qui elle ne plaira pas pourront, après avoir lu cette préface, laisser de côté ce maigre essai, en s'écriant avec Montaigne: "Personne n'est exempt de dire des fadaises," ou, avec Térence: Næ iste magno conatu magnas nugas dixit; ce qui ne nous empêchera pas de nous dire, comme de chacun de nos bénévoles lecteurs,

Leur très humble serviteur, -

D. ROTH.

Paris, le 1er mai 1846.

PRÉFACE DE L'AUTEUR.

Quinze années se sont écoulées depuis que j'ai publié pour la première fois un répertoire des médicaments homœopathiques. Le succès que cet ouvrage a obtenu, soit dans les éditions originales, soit sous la forme des Manuels, composés sur le même plan, et sans modification essentielle, par le laborieux M. Jahr, en prouve suffisamment l'utilité.

Un aussi long usage était plus que suffisant pour faire juger de ses avantages et de ses défauts, tandis que, d'un autre côté, la publication d'ouvrages semblables jusque dans ces derniers temps montre que le besoin qu'on en éprouve n'est pas encore satisfait.

Il est hors de doute qu'aucun répertoire, quelque complet qu'il soit, ne remplacera jamais l'étude consciencieuse de la matière médicale pure; aussi n'ai-je jamais eu l'intention de la rendre inutile; je regarde, au contraire, comme nuisibles tous les livres qui tendent à ce but. Mais, à mon tour, je demanderai qu'on m'accorde que le médecin homœopathe peut se livrer à cette étude seulement dans ses courts instants de loisir, et que, dans la pratique, il est bon qu'un résumé clair, succinct et lui offrant les principaux caractères des symptômes, vienne au secours de sa mémoire pour le mettre en état, dans tout cas de maladie concret, de choisir avec certitude, et sans perte considérable de temps, le médicament qui convient le mieux parmi les médicaments indiqués.

Les défauts des répertoires publiés jusqu'à ce jour proviennent, selon moi, principalement de ce que les auteurs se sont renfermés dans les limites de la matière médicale pure, en y rattachant sans doute les faits bien

constatés fournis par la pratique, mais sans aller jusqu'à les mettre à profit toutes deux pour apprécier la valeur de chaque symptôme, pour les compléter l'une par l'autre, et pour aider à combler les lacunes qui frappent à chaque instant le praticien.

Si un grand nombre de symptômes sont incomplets, parce qu'on n'indique pas la partie du corps où ils se sont manifestés, ou la nature des sensations, et surtout parce que l'on ne signale pas le temps, le lieu, les circonstances de l'exacerbation ou de l'amélioration : les difficultés que rencontre leur juste appréciation dans le traitement d'une maladie redoublent encore par l'impossibilité d'en découvrir le caractère principal dans un seul symptôme, quelque complet qu'il soit; par l'influence considérable et trompeuse qu'exerce toujours sur les résultats de l'expérimentation l'individualité de l'expérimentateur, sans parler d'une foule de symptômes alternatifs d'un ordre inférieur, et de symptômes secondaires : enfin, et surtout, par la nécessité absolue de recourir à la matière médicale pure pour juger de la valeur de la plupart des symptômes par la comparaison attentive de l'ensemble des phénomènes, comparaison qui ne peut jamais se faire à l'instant même et sans préparation.

Il en est résulté inévitablement dans les anciens répertoires, d'un côté, la dissémination de beaucoup de symptômes plus ou moins importants sous différentes rubriques, et par suite, une grande difficulté à saisir l'ensemble; de l'autre, une foule de lacunes impossibles à combler, l'analogie n'ayant aucun point d'appui.

Cette incertitude et cette pauvreté au milieu des richesses qui ont frappé tout homœopathe m'ont engagé, il y a plusieurs années, à chercher le moyen de faire disparaître ces défauts, autant au moins que le permet l'état actuel de l'homœopathie, et je dois remercier ici les mânes de S. Hahnemann, mon maître et mon ami, des excellents conseils qu'il m'a donnés par une correspondance non interrompue jusqu'à la fin de ses jours.

Dans la crainte d'éparpiller davantage encore les symptômes, et de m'exposer ainsi à des reproches mérités, j'eus d'abord l'idée de conserver la forme et le plan de mon premier répertoire. J'y étais d'autant plus disposé que Hahnemann m'avait répété plusieurs fois que mon travail valait mieux que tous ceux qui ont été faits depuis. J'avais l'intention de le publier en un seul volume, tout en le précisant dans toutes ses parties, et en le complétant par l'analogie et l'expérience; mais le manuscrit. achevé à moitié, s'étendit considérablement et prit des proportions inattendues. J'y renonçai donc d'autant plus facilement que je m'aperçus que très vraisemblablement j'atteindrais le but d'une manière plus simple et plus complète à la fois, si, en faisant ressortir les symptômes particuliers et caractéristiques des médicaments d'après leurs différents rapports, j'ouvrais une voie dans le vaste champ, encore inexploré, de la combinaison.

Pour être certain de ne pas augmenter la littérature homœopathique d'un livre inutile, il me fallut d'abord interroger l'expérience, et lorsqu'elle m'eut répondu d'une manière plus satisfaisante que je ne m'y attendais sur l'usage d'une semblable méthode se bornant aux médicaments polychrestes; lorsque le fondateur de la nouvelle école eut approuvé mon idée, qu'il qualifia d'excellente et de féconde, je n'hésitai plus à refondre entièrement mon ouvrage, et à lui donner la forme du Manuel que j'offre aujourd'hui au public, en le priant de l'accueillir avec bienveillance, et d'excuser des défauts et des erreurs inséparables d'un premier essai.

Le but de ce Manuel est double, comme je l'ai indiqué dans le titre : d'abord, d'aider la mémoire du médecin

au lit du malade dans le choix du médicament, et ensuite, de servir dans l'étude de la matière médicale pure comme d'un guide au moyen duquel on puisse s'orienter, juger du plus ou moins de valeur de chaque symptôme, compléter la connaissance que l'on en a, et la préciser.

La grande quantité de médicaments rangés sous chaque rubrique rendait nécessaire, pour l'un comme pour l'autre cas, d'indiquer par la différence du caractère la différence de valeur de ces médicaments. Je l'avais déjà fait dans mes précédents répertoires avec l'approbation complète de Hahnemann. Les médicaments sont donc classés en cinq subdivisions distinguées par le caractère, dans tout le cours de cet ouvrage. Les quatre principales se présentent très distinctement dans la première division sous la rubrique Avidité, pag. 2, n° 3. Par celles-là, on peut juger des autres.

Le mot PULS, imprimé en grandes capitales, y occupe la place la plus apparente, la première, celle qui est occupée le plus souvent. Suivent en progression décroissante les mots ars. et lyc., en petites capitales, comme moins distingués, quoique recommandés encore tant par la caractéristique des médicaments que par la pratique. Au dessous sont rangés les mots natr. et sep., en caractères italiques, et au dernier degré de valeur se présente calc., imprimé en petite gaillarde. La cinquième et dernière place est occupée par des médicaments douteux, qui ont encore besoin d'être sanctionnés par l'expérience, et qui se présentent le plus rarement; ils sont mis entre parenthèses, comme, par exemple, pag. 88, n° 481, les mots (arg.), (asar.), (bism.), (cic.), et quelques autres.

Il est inutile de dire que cette classification, qu'il n'a paru ni convenable, ni facile d'étendre, n'est pas d'une exactitude mathématique; qu'elle n'indique qu'un rapprochement plus ou moins grand vers le degré supérieur ou inférieur. Tout ce que je me proposais, c'était qu'en se trompant on restât au-dessous d'un demi-degré. Je ne veux pas prétendre qu'en dedans de ces limites on doive toujours rencontrer juste; cependant je puis affirmer que je n'ai rien épargné, ni travail, ni soins, ni précautions, pour rendre les erreurs aussi rares que possiblé.

Le plan de cet ouvrage est facile à comprendre; il n'est pas besoin de longues explications. Il est divisé en SEPT PARTIES parfaitement distinctes l'une de l'autre, et dans chacune de ces divisions, pour faciliter les recherches, l'ordre systématique a été autant que possible combiné avec l'ordre alphabétique. Quoique chaque partie doive être considérée comme un tout complet, elle ne donne cependant jamais qu'une partie d'un symptôme qui reçoit son complément de l'une ou de plusieurs des autres parties. Dans l'odontalgie, par exemple, le siége de la douleur se trouve dans la seconde; l'espèce de douleur, dans la troisième; l'exacerbation ou la diminution de la douleur, selon le temps, le lieu et les circonstances, dans la sixième; et ce qui est nécessaire comme accessoire, pour compléter le tableau de la maladie et pour garantir le choix du médicament, doit se chercher également dans les différents chapitres.

Quant à la première partie, nous ferons observer particulièrement que, d'un côté, nulle part notre matière médicale pure n'est plus riche en symptômes secondaires que dans les symptômes moraux, et de l'autre, que la plupart des homœopathes, au début de la carrière, ont coutume de négliger cette partie d'un tableau complet de la maladie, ou de commettre des méprises. J'ai donc cru utile de rassembler ici, sous le plus petit nombre de rubriques possible, tout ce qu'il y a de plus essentiel, afin de faciliter les recherches. Le chapitre intitulé intellect

pouvait également être considérablement simplifié; parce que beaucoup de phénomènes reçoivent d'ailleurs leur signification précise, comme, par exemple, l'aliénation mentale des différentes nuances du moral.

Dans la seconde partie, j'ai réuni également tout ce qui pouvait l'être, parce que le but de tout l'ouvrage est d'expliquer une chose par l'autre. Par contre, on y remarquera plusieurs symptômes dont l'importance s'est révélée dans la pratique (par exemple, tête extérieure, face, toux), et qu'on chercherait vainement dans d'autres ouvrages. Au reste, cette partie sert surtout à faire connaître quels médicaments agissent plus ou moins fortement sur les différentes parties du corps et les différents organes. Sous la rubrique de quelques organes sont donnés quelques autres symptômes restreints à ces organes, et qui n'ont pu trouver place ailleurs.

La troisième partie renferme, dans l'ordre alphabétique, toutes les sensations et les douleurs, 1° d'abord en général, puis en particulier; 2° dans les glandes; 3° les os; 4° à la peau et à l'extérieur. Ce qu'il y a de plus ou moins caractéristique dans l'espèce de douleurs est présenté dans ce chapitre.

La quatrième partie traite du sommeil et des rêves. La cinquième partie, des fièvres, mais seulement d'après les différences essentielles et bien caractérisées.

Je dois donner quelques explications sur la rubrique « souffrances concomitantes, » qui revient fréquemment dans la deuxième, la quatrième et la cinquième partie. Convaincu de l'importance des symptômes qui se manifestent en même temps que d'autres, et forment avec eux un groupe, j'ai recueilli depuis plusieurs années tout ce qui appartient aux symptômes accessoires signalés dans la matière médicale pure, toutes les données de ma propre expérience et de l'expérience des autres, et le

nombre s'en est tellement accru que j'ai été en état d'en tirer des règles générales. Ces règles prouvent avec une grande évidence qu'un médicament répond mieux qu'un autre aux symptômes accessoires qui se manifestent avant, pendant ou après le mal primitif, mais en même temps que ces symptômes accessoires ne consistent pas exclusivement en tels ou tels accidents; qu'au contraire, toute espèce de douleurs rentrant dans la sphère d'action du médicament peut se joindre à la maladie, bien que les symptômes caractéristiques s'offrent plus fréquemment que les autres.

C'est sur cette découverte, soumise à de longues expériences qui l'ont toujours confirmée, qu'est fondée la rubrique des « souffrances concomitantes, » avec indication du rang d'ordre des médicaments par la différence du caractère. Quand de semblables symptômes se présentent, il faut les chercher parmi les symptômes caractéristiques du plus ou moins grand nombre de médicaments rangés sous cette rubrique.

La sixième partie, qui contient les changements de l'état selon le temps, le lieu et les circonstances, ne le cède en importance à aucune des précédentes; mais elle demande d'extrêmes précautions dans la pratique. Il faut se garder surtout de prendre pour une exacerbation de la maladie ce qui n'est proprement qu'un effet secondaire (ou effet alternatif) du médicament, même dans le cas où il se manifeste d'ailleurs une exacerbation dans l'état général. Par exemple, la diarrhée qui n'a lieu que le matin se guérit très souvent par Bryon., quoique la constipation et l'exacerbation du soir appartiennent aux effets primitifs de ce médicament. Des accidents semblables à ceux que l'on désigne sous le nom d'effets secondaires ou alternatifs se présentent aussi fréquemment dans les maladies naturelles où se déclare un état contraire à l'affection propre-

ment dite, et également douloureux, lequel peut aisément induire le médecin inhabile à choisir un médicament peu convenable. Sous un autre rapport, les conditions de l'exacerbation ou de l'amélioration, que nous venons de signaler, sont, avec l'affection générale et ses symptômes, dans une relation beaucoup plus étendue qu'on ne le penseordinairement, et jamais elles ne se bornent exclusivement à tel ou tel symptôme; au contraire, il arrive très souvent que le choix du médicament convenable en dépend. Pour n'en donner qu'un exemple, je citerai le cas suivant. Mon ami le docteur Lutterberk donna en mon absence à un de mes malades (que je lui confie toujours en pareil cas) contre quelques restes d'une phthisie tuberculeuse, dont je l'avais guéri, notamment contre un poli désagréable des dents avec mucosité abondante, s'exacerbant considérablement pendant deux jours, toutes les fois qu'il se faisait la barbe, carb. an. 30, avec le plus grand succès, quoique le seul symptôme de la peau de la face (152), observé (1) par le docteur Adams, n'existât pas, et surtout que ce symptôme d'exacerbation n'eût pas été une seule fois parfaitement constaté.

L'homœopathe expérimenté remarquera donc aisément que j'ai donné un soin tout particulier à ce chapitre, et que j'y ai admis beaucoup de choses qui m'ont été fournies par ma propre expérience, et que l'on chercherait en vain dans la matière médicale pure ou ailleurs.

La septième et dernière partie, sous la rubrique de "Concordances, "donne les résultats d'une comparaison des effets de tous les médicaments mentionnés, d'abord par rapport à chacune des parties précédentes, puis la concordance des médicaments en général, le tout rangé

⁽¹⁾ Doctrine et traitement homæopathique des maladies chroniques de S. Hahnemann, trad.par le docteur Jourdan, seconde édition. Paris, 1848, vol. I, p. 615.

dans le même ordre que dans le reste de l'ouvrage. Ce travail long et pénible (qu'une connaissance approfondie de la matière médicale pure m'a rendu toutefois plus facile) ne sera regardé par personne, j'aime à le croire, comme inutile et superflu. Pour moi-même, qui depuis quinze ans ai fait ma principale étude de la matière médicale pure, une des parties les plus essentielles de l'homœopathie à mes yeux, ces concordances ont été de la plus haute importance; elles m'ont aidé non seulement à connaître le génie des médicaments, mais encore à fixer mon choix et à déterminer la série des différents médicaments à administrer, nommément dans les maladies chroniques. Sans doute il faut, pour cela, que l'on possède assez bien la matière médicale pure : mais ce qui facilite beaucoup aux commençants l'usage de ces concordances. c'est que les polychrestes riches en symptômes offrent naturellement le plus de points de contact, et que, par conséquent, une connaissance exacte de ces médicaments suffit pour mettre en état de s'en servir sans difficulté et avec grand profit. A la fin de chaque médicament sont indiqués les antidotes connus et les médicaments nuisibles.

Il peut être utile pour ceux qui débutent dans l'homœopathie, et à qui ce Manuel est particulièrement destiné, d'ajouter quelques mots sur son usage, relativement surtout à son double but, signalé plus haut.

En étudiant la matière médicale pure, je me suis fort bien trouvé de souligner au crayon, d'après l'ordre de ce Manuel, tous les symptômes caractéristiques désignés par la différence du caractère de l'impression, principalement dans les ouvrages originaux et aussi dans mon répertoire ou dans un autre, en ajoutant ceux qui avaient été omis. Ce travail coûte peu de temps et de peine, et il donne un aperçu facile, qui peut être complété à mesure que s'étend le champ des expériences. De cette manière, on acquiert une connaissance approfondie des symptômes les plus importants et du génie de chaque médicament, et on se forme en même temps un recueil durable de ce qui mérite le plus d'être retenu. Cela s'imprime profondément dans la mémoire; on peut y recourir dans les cas compliqués, et souvent on doit à ce travail le choix d'un médicament qui rend les plus grands services.

Quant à l'usage de ce Manuel au lit des malades, un point important est de savoir si celui qui s'en sert est encore un commençant ou s'il a déjà des connaissances en homœopathie et de la pratique. Celui qui ne sait absolument rien est sans doute obligé de parcourir le livre d'un bout à l'autre sans en passer une seule page. Plus il apprend, moins il a besoin de chercher, et finalement il lui suffit de recourir à sa mémoire. Un exemple me fera mieux comprendre. Je choisis un cas traité par moi. Le choix du médicament n'était pas difficile, rien ne paraissait même plus simple; cependant, faute d'attention, on pouvait se tromper. Cette histoire pourra servir en outre à beaucoup de commençants pour évaluer eux-mêmes la mesure de leur savoir.

E. N., de L., homme d'une cinquantaine d'années, au teint florissant, presque trop haut en couleur; d'une humeur habituellement gaie, mais sujet à des accès de colère dans la violence des accès; d'une constitution évidemment nerveuse et irritable, souffrait déjà depuis une couple de mois (à la suite du traitement allopathique d'une prétendue douleur rhumatismale dans la cavité de l'œil droit, par des moyens extérieurs que je ne pus connaître) d'une violente douleur d'une espèce particulière à la jambe droite, douleur qui occupait tous les muscles de la partie postérieure, nommément le mollet jusqu'au talon, sans attaquer toutefois les articulations du genou ou du pied. Il décrivait cette douleur comme un tirail-

lement excessivement douloureux et tressaillant, fréquemment interrompu par des élancements qui partaient de l'intérieur vers l'extérieur, sourdement fouillants le matin. où la douleur était en général plus supportable, et comme une douleur de brisure (courbature). Les douleurs s'exacerbaient vers le soir et dans le repos, surtout après un mouvement, assis et debout, et notamment pendant une promenade au grand air. Pendant la marche même, le douleur sautait souvent tout-à-coup du mollet droit dans le bras gauche, et c'était alors qu'elle était le plus insupportable, quand il mettait la main dans sa poche ou dans son sein, et qu'il tenait le bras tranquille, tandis que le mouvement du bras la diminuait et la renvoyait souvent tout-à-coup dans le mollet droit. Ce qui le soulageait le plus, c'était de se promener dans la chambre et de frictionner la partie souffrante. Les accidents concomitants étaient insomnie avant minuit; accès fréquents, le soir, de chaleur fugace avec soif, sans prodromes de frissons; goût de graisse rebutant dans la bouche, avec malaise dans la gorge et douleur pressive presque continuelle dans la partie inférieure de la poitrine et dans le creux de l'estomac, comme si quelque chose cherchait à en sortir.

En face d'un tableau si complet et si exact de la maladie, un homœopathe exercé et connaissant bien les effets de ses médicaments n'hésitera pas-longtemps sur le choix du médicament salutaire; car l'ensemble des symptômes ne répond absolument qu'à un seul. Le commençant, au contraire, se verra forcé de chercher presque chaque symptôme, et ce ne sera qu'après une longue exploration qu'il trouvera le médicament le plus convenable perdu au milieu de ses concurrents. Entre ces deux extrêmes de la science et de l'ignorance, il y a de nombreux degrés de demi-savoir qui nécessiteront une recherche plus ou moins longue.

L'un, par exemple, sait que les douleurs sautant rapidement d'une partie dans l'autre, s'exacerbant le soir et dans le repos; que le goût de graisse dans la bouche, l'insomnie avant minuit et quelques autres des symptômes signalés, appartiennent surtout à l'effet de pulsatilla; mais il n'est pas sûr qu'il en soit de même, du reste, des symptômes, et s'il veut procéder consciencieusement, il ne pourra s'éviter la peine de comparer aussi ces derniers. Or, il ne tardera pas à s'apercevoir que pulsatilla ne peut pas être dans le fait le véritable remède homœopathique; car, outre les symptômes moraux, il y en a encore d'autres qui n'offrent aucune analogie, ou qui même sont contraires à ceux de ce médicament.

Un autre a étudié davantage le caractère particulier des douleurs, et il se souvient fort bien que china répond aux douleurs de paralysie et de brisure, ainsi qu'au tiraillement tressaillant, et à la douleur lancinante de dedans en dehors; il sait aussi qu'il offre des douleurs sautant d'une partie dans l'autre. Il croit être sûr, en outre, que d'autres symptômes, comme l'insomnie avant minuit, l'exacerbation dans le repos, l'amélioration par le mouvement et les frictions, les chaleurs fugaces avec soif, conviennent à ce médicament; mais il ne sait rien du reste des symptômes, et lui aussi il doit chercher. Alors il tombe bientôt, comme le précédent, sur des contradictions qui lui prouvent que china n'est pas le médicament convenable dans le cas donné.

Il ne viendra à la pensée ni de l'un ni de l'autre d'essayer sur le malade un médicament dont la vertu curative est si douteuse dans ce cas; mais, comme de consciencieux médecins homœopathes, ils se remettront à chercher, à comparer, et, avec le secours de ce Manuel, ils arriveront sans grande peine à trouver le seul médicament vraiment homœopathique dans cette maladie.

Si un troisième est assez familier avec l'homœopathie pour reconnaître de prime abord les symptômes contradictoires de puls., chin. et autres médicaments concurrents, et si en même temps il ne connaît pas valeriana. qui répond aux principaux symptômes, assez bien pour être sûr de son fait en administrant ce médicament rarement employé, il lui suffira de jeter un coup d'œil rapide sur quelques symptômes douteux pour se convaincre que, de tous les moyens connus, celui-là est le plus efficace, ce que le résultat a confirmé. En effet, après une seule dose extrêmement faible de ce médicament à haute puissance, prise en solution aqueuse, l'affection disparut complétement en trois jours avec tous les symptômes accessoires. Il sera difficile à un demi-savant qui ne veut consulter que les sources, et qui méprise toute espèce de répertoires, de découvrir ce médicament, rarement administré en pareil cas(1), tout au moins il lui faudra consacrer beaucoup de temps et de peine, qu'il pourrait plus utilement employer. Supposé même qu'il finisse par le découvrir, il hésitera en présence des doutes qui surgiront dans son esprit, et qu'il ne lui sera pas facile de résoudre. s'il n'a pas acquis quelque expérience, parce que la plupart des symptômes qui en indiquent l'emploi ont besoin d'être complétés plus ou moins par la caractéristique du médicament, pour répondre exactement aux symptômes de la maladie.

Ce qu'il y a encore de bien plus difficile, sans le secours d'un répertoire, pour les homœopathes novices, c'est la guérison de maladies se manifestant par un petit nombre de symptômes auxquels répondent un grand

⁽¹⁾ Voy. Pathogénésie de la Valériane, traduction, par le docteur de Moor. *Revue de la matière médicale homoropathique*. Paris, 1842, vol. IV, p. 310.

nombre de médicaments. Par exemple, une coqueluche maligne sévissait parmi les enfants des environs. Dans l'origine, elle ne présentait que par exception les indications connues pour dros; jamais celles pour les autres remèdes ordinairement employés contre la coqueluche. Cependant on remarquait, chez les enfants malades, une bouffissure et une tuméfaction non pas tant de la face que du dessus des yeux, entre les paupières et les sourcils, où il se formait fréquemment « une poche » épaisse, symptôme qui n'avait jamais été observé parmi ceux d'aucun médicament, si l'on en excepte kali carb. (219); et dans le fait, ce médicament (1) fut le seul qui, au début de l'épidémie, procura une guérison prompte et durable. Ce ne fut que dans la dernière période que cette maladie prit ufie autre forme caractérisée par une sueur froide au front et des vomissements pendant les accès, symptômes qui exigeaient l'emploi de veratr. alb.

Ce n'est pas ici le lieu de m'expliquer sur la grandeur et la répétition des doses, d'autant plus que la question n'est pas jugée. Cependant je ne puis m'empêcher d'affirmer, en renvoyant à ce que j'ai dit à ce sujet dans les Nouvelles archives homœopathiques, que mes expériences se sont toujours prononcées pour les hautes puissances, de même que contre les répétitions fréquentes et sans médicament intermédiaire. Même dans les affections des os, par exemple, dans les déviations de la colonne vertébrale, j'ai vu les hautes puissances procurer une guérison complète en beaucoup moins de temps que les basses dynamisations. Je ne puis donc, en m'appuyant sur une assez longue expérience, que confirmer ce qu'ont dit à cet égard plusieurs médecins du premier rang, et depuis

deux ans que je n'administre presque que de hautes puissances, je suis beaucoup plus content des résultats qu'auparavant, quoique la plupart de mes malades soient de ces patients qui nous arrivent si souvent en sortant des mains des allopathes.

Je terminerai en soumettant cet ouvrage comme le fruit d'un travail de près de trois années à un examen approfondi et impartial, mais bienveillant, et en me recommandant moi-même à tous les amis du bien, à tous ceux qui, comme moi, ont pris la ferme résolution de consacrer le reste de leur vie à l'homœopathie et à l'humanité souffrante.
